The Organizing Committee of the IEEE 13th Latin American Symposium on Circuits and Systems (LASCAS 2022) invites proposals for Tutorials to be held during the week of the conference in Puerto Varas, Chile, between March 1-4, 2022. (http://ieee-lascas.org/)

Tutorials are intended to serve as extended lectures (half-day or full-day). Suggested formats include, but are not limited to:

- A broad review of specific topics on particular topics in an area of Circuits and Systems.
- Sessions to introduce practical aspects of modern techniques, design flows, and tools.
- Description of open problems or practical case studies in academia and industry.

Tutorials should be kept general or introductory enough to be attractive and compelling to a broad audience, including students, researchers, and industry attendees with mixed backgrounds in circuits and systems.

**Tutorial Proposals**

Please submit proposals (maximum 2 pages) in PDF format by email to the Tutorials Co-chairs (included below). All submissions should include at least the following information to be evaluated:

1. Title.
2. Length (half day / full day).
3. Abstract.
4. Keywords.
5. Learning objectives, target audience, and expected background of attendees.

Important aspects in the evaluation of tutorial proposals will be the timeliness of the topic, the quality/track record of the proposers and speakers, and the expected value added to the overall technical program. All submitted proposals will be evaluated by the organization committee of the conference.

**Important dates:**

Submission deadline: October 1st, 2021.
